FOREWORD

The Karamoja Development Partners Group (KDPG) is made up of donors and UN agencies working in the Karamoja sub-region. Key objectives include enhancing dialogue between development partners and the Government of Uganda (GoU), at both national and regional level and strengthening co-ordination and harmonization between development partners including alignment with GoU priorities as expressed in the Karamoja Integrated Development Plan

This donor mapping exercise has been compiled by the USAID supported Karamoja Resilience Unit (KRSU), on behalf of the KDPG. The KRSU is playing a critical role in supporting the KDPG and working to improve analysis, collaborative learning and evidence-based decision making.

The 10 donors who have inputted to this mapping exercise – Department for International Development (UK), USAID, World Bank, Irish Aid, SIDA (Sweden), EU, Germany, Japan, KOICA (Korea) and Italy provide a significant majority of the external funds flows to Karamoja. These funds are then channeled through local and central Government, UN agencies and Civil Society Organisations. Other external funds flows to Karamoja include those from foundations such as the MasterCard Foundation and own funding from UN agencies and CSOs.

This is the second year that the KDPG has produced this mapping exercise. This year it is estimated that these 10 donors will provide €89 million (approx. 380 billion Ugx) during 2017. The analysis provided in this report (see Section 2) demonstrates that this funding is provided across all sectors with a particular focus on the basic service delivery (KIDP strategic objective 1) and food security (KIDP strategic objective 6).

Karamoja is going through a period of transition and over the coming period there will be increasing engagement and investment from donors, as efforts continue to combat poverty and inequality, and to sustain socio-economic development. The KDPG will continue to play its part in supporting strengthened co-ordination and information sharing with GoU and other key stakeholders, including updating this mapping exercise on an annual basis.

Áine Doody,

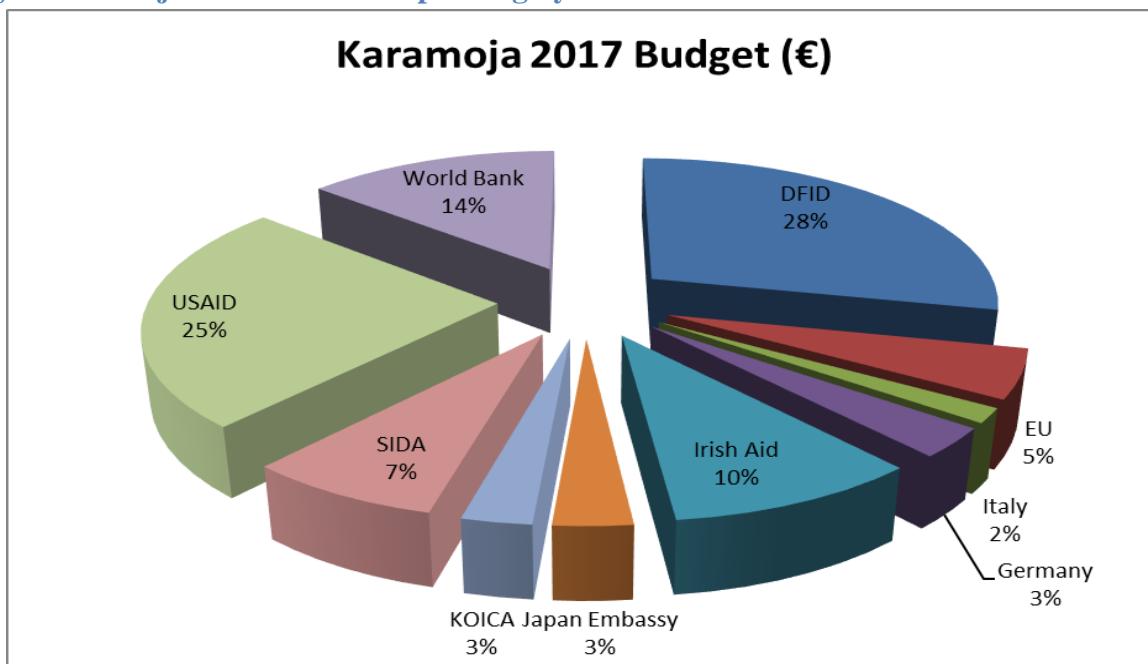

Deputy Head of Co-operation, Irish Embassy,

2016 Chair of the Karamoja Development Partners Group

SUMMARY OF KEY FINDINGS

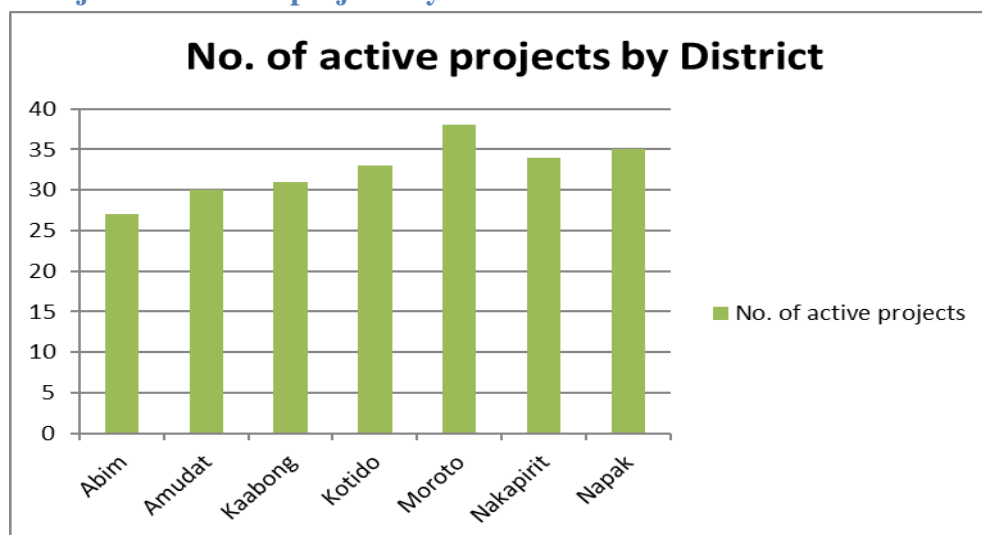

There are 10 major bilateral donors supporting development activities in Karamoja. In 2017 the 10 bilateral donors' spending is estimated to be **89 million Euros**, which is approximately **380 billion Ugx**. DFID's support represents 28% of the total estimated donors' spending in Karamoja followed by USAID, WB and Irish Aid with 25%, 14% and 10% respectively. See the chart below for details

Fig. 1 Karamoja 2017 estimated spending by donors

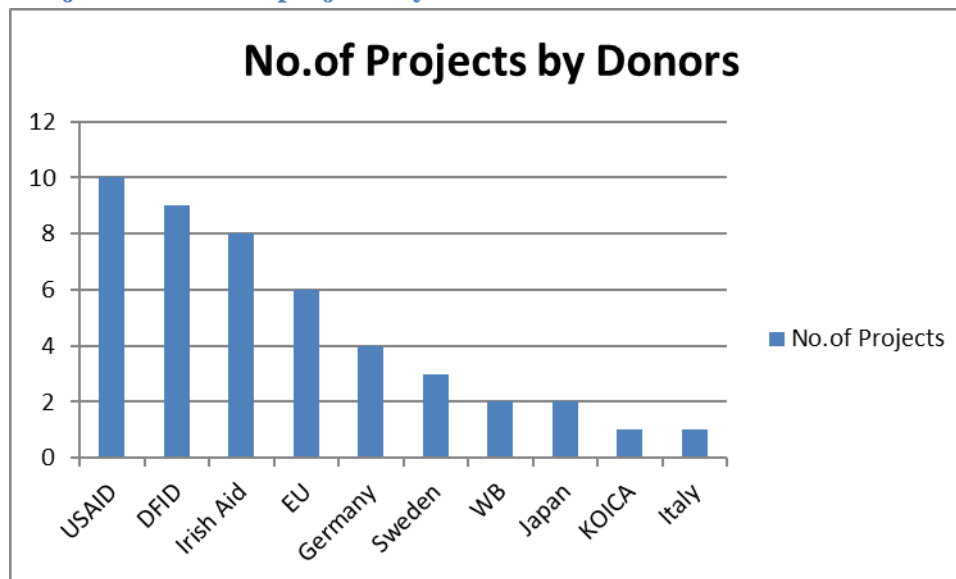

A total of 46 active projects are funded by the 10 bilateral donors. The projects distribution across the 7 districts shows a uniform pattern except in Moroto where there are relatively higher numbers of projects.

Fig. 2 Karamoja No. of active projects by district

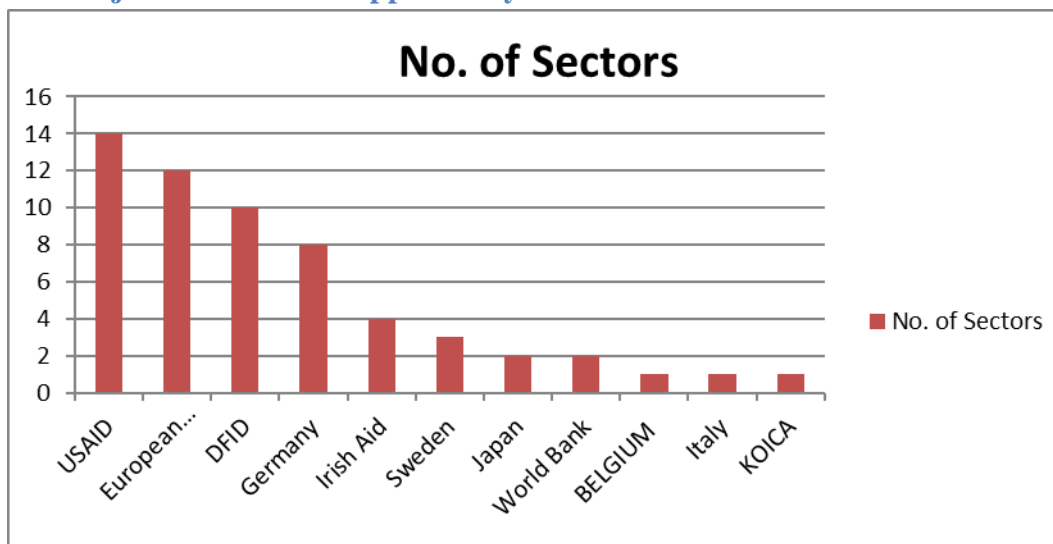

Most donors support multiple projects. Out of the total 46 active projects USAID, DFID, Irish Aid and EU fund 10, 9, 8 and 6 projects respectively. See the chart below for details.

Fig 3. Karamoja No. of active projects by donors

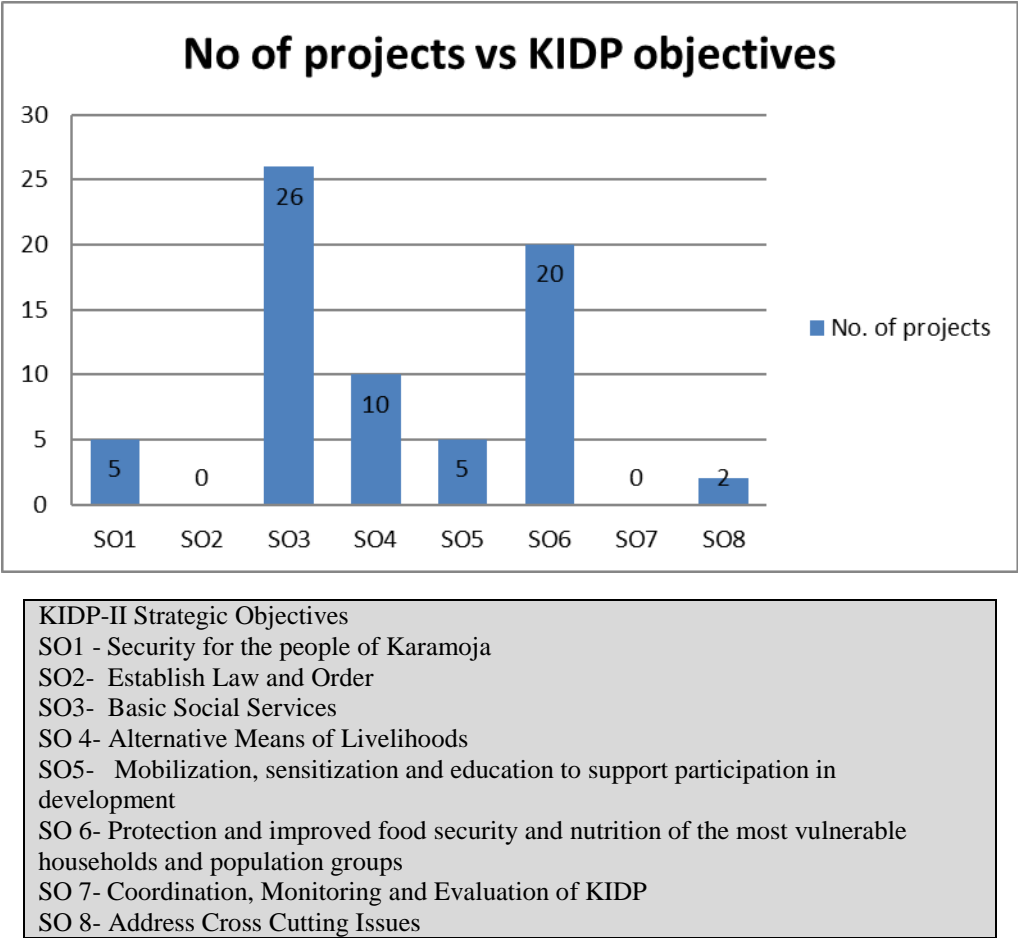

Most of the donors support multiple development sectors. USAID, EU, DFID and Germany support 14, 12, 10 and 8 sectors respectively. Detail breakdown of which donors support which particular sectors is presented in table 5.

Fig. 4 Karamoja No. of sectors supported by donors

The majority of the projects are aligned to Strategic Objective 3 of the Karamoja Integrated Development Plan (KIDP), which is focusing on basic social services and Strategic Objective 6 which addresses protection, food and nutrition security. The chart below illustrates the number of projects and their alignment to the different objectives.

Fig. 5 Karamoja Donor projects alignment to KIDP objectives

Most of the donor funding is channeled through NGOs, both international and local civil society and a significant proportion is also channeled directly through multilateral agencies and the government at national and local levels. Some funding is allocated to bilateral organizations such as Belgian Technical Co-operation and private sector actors. The chart below presents the proportion of funding by the different type of organizations.
